101005 - Printed fault codes.

10231- diagnosed for coolant pressuring up. pressure cap was loose
secured and tested the opening pressure. checked for gases in the
coolant and there was lots. inspected for air in fuel and it was
present. removed injectors. removed cups, it is difficult to see if the
cups had leaked combustion, coolant could have washed it away. found
injector tips worn and injector 4 had a broken spring. replaced
injectors and cups. road tested and all appears well. unit needs a
surge tank as the level sensor is stuck. customer declined.
