Installed reman transmission as per request. Reinstalled removed
components, torqued torque converter bolts and tightened to
specifications. Provided estimate to replace engine mount and fasteners
as per dealerconnect service warning/procedure. Customer declined
replacing transmission mount and fasteners. Refilled transmission to
proper operating level. After reinstallation found vehicle would not
start. Found transmission ground had excessive paint on surface, found
still poor ground after cleaning. Found service bulletin S1121000006.
Used booster cables as a redundant ground and found vehicle started
properly. Discussed findings with customer. Installed redundant 8 gauge
ground from transmission bellhousing bolt to body. Found unable to do
quicklearn - found scan tool data shows transmission temperature too
cold - vehicle is warmed up. Flashed PCM from software version
68250756AB to AF and cleared codes. Performed transmission quicklearn
procedure.

I** REPLACE HOSE CLAMPS FROM COOLANT HOSES (MIGHT LEAKING COOLANT)
(FOUND DRY COOLANT UNDERNEATH VEHICLE)
